Research firm: RF Micro increasing market share

The Business Journal of the Greater Triad Area - 11:18 AM EDT Wednesday

Gartner Inc. has ranked **RF Micro Devices** as the seventh-largest supplier of subscriber RF and baseband semiconductor application-specific devices, according to an announcement from RF Micro.

That's an advance of two positions for the Greensboro-based chipmaker in the independent research firm's annual survey. Gartner also said RF Micro (NASDAQ: RFMD) retains its No. 1 worldwide position in the cell phone power amplifier market, where it has more than twice the market share of its nearest competitor, the firm said. Rankings of size and market share were based on global revenues.

Eric Creviston, RF Micro's corporate vice president for the cellular products group, said the Gartner report confirms the company's own assessment.

"We believe Gartner's independent, third-party research findings validate our ongoing market share gains and continued growth," Creviston said.
